HEAT PUMP

Check out the Help Guide or watch the Videos to find out more about your new unit.

Not Used

- R = Red 24V
- GN = Green Fan
- BC = Brown Common
- BK = Black Common
- Y = Yellow A/C-1
- B = Blue Reversing Valve (RV)
- O = Orange
- WE = White Heat
- P = Purple A/C-2
- GY = Grey Dehumidifier (DH)

*L1 and L2 connections must be made in the field they are not factory connected. Connect to T1 and T2 on the Breaker to supply line voltage to the board and Fan Motor. *Reversing valve energizes in Heat Mode and must be used on the B setting, may need to change from the O terminal. Note: Please refer to actual wire instructions when coupled with other manufacturers, Some manufacturers use different color code connections.
